Mandukya Upanishad, Class 38

In four stages, Gowdapadha is

establishing that either the jiva nor jagat is born out of Brahman and

therefore Brahman the thuriyum is not a karanam at all. First, he logically

established the non-origination of jiva and jagat. Now he is scripturally

establishing the non-origination of jiva and jagat. Now we are in the

fourth topic, the scriptural negation of jagat. When Gowdapadha says that

world is not born out of Brahman two points should be remembered:

- 1. Gowdapadha only negates the creation of real world and negates only the creation of apparent world.
- 2. From the Thuriyum stand point alone the world is unreal. From the stand point of out body mind complex, the world has to accepted as very real. Similar to the dream is

the waker's stand point.

An unreal creation is useful as a

unreal only from

stepping stone to come to the reality, the Thuriyum. Dwaidam is

acceptable and useful in gaining sadhana sadhusta sambundhi. Dwaidam in

the form of karma and upsana is required until gaining sadhana sadhusta

sambandhi. For mandha and madhyama adhikari dwaidam is required and for

uthama adhikari advaidam is required.

17th to 22 verses are diversion to

say that if you don't accept advaidam and take dvaidam as the ultimate reality,

then you will have many problems.

 Raga dwesha problem or emotional problem. If the religion is not used as a stepping stone to advaidam, then religion will

become phonytic. When a person is in duality, he is in thrupudi

pramadha, pamanam or premayam: Cause, effect and instrument.

In advaidam a person will at himself as pramadha and use a set of prmanam

and the truth or the world I see will never be objective, because it

depends on the instrument and as a result the pramayam will differ from

instrument to instrument. Each one will talk about the reality as

interpreted by his background — intellect, poorva jenma
etc. Therefore,

for every pramadha his own world is the reality and will not know what the

reality for someone else. The truth will be relative — vyavakarika

sathyam. Each religion is a threat to other religion. Each

religion thinks the other is wrong.

Verse 18

Non duality is indeed the absolute

Reality. Duality is said to be manifestations only. For dualitst,

duality exists both temporarily and absolutely. Hence this teaching is

not in conflict with them.

Advaidam alone is the absolute

reality; duality is only its apparent manifestation. One Brahman alone

appears as vyavaharikaly appears as pramadham, pramayam and premanam. For

a dwaiting, it is not possible. Dwaidam alone is the absolute reality and

therefore the problems are also absolutely real. Samsara and moksha are

all dwaidam. They will say you are jiva and different from god. In

moksha, you will be serving the lord instead of serving ordinary people in this

life. Also, there will be gradation and all moksha's will be allowed at

the same place. Even in moksha they have duality. An advaidin will

never criticize even an animal sacrifice; animal is killed for eating all over anyway.

Verse 19

The birth-less Atma becomes

differentiated through maya only; not in any other manner. For, if it is

really differentiated, the immortal Atma will undergo mortality.

Where there is duality, there will

be jealousy. In this verse he talks about intellectual problems.

Advaidam Brahman is beyond time and space; infinite principle which can't

undergo a change (six changes). Brahman being infinite, does not undergo

any changes; it is logically impossible. Brahman undergoes a seeming

change and appear as universe just as the mind appears as dream world.

This changeless Brahman multiplies itself into pluralistic creation only

apparently, seemingly. If Brahman does undergo a change, then infinite

will become finite, which is logically impossible.
